

Communicating with Data – Thanks for a great semester!

Dr. Ab Mosca (they/them)

Demo day

1. (20 mins) Half of each group, move around the room and interact with other groups' projects. Give constructive feedback! The other half of each group stays with the project to demo it.
2. (20 mins) Switch who is moving around and who is demo-ing.
3. Return to seats & wrap up the semester

Cheers to you!

This semester you...

- Thought deeply about *where* data comes from and the structural oppressions present in it
- Used data-visual mapping, mental models, perception, and storytelling to communicate data
- Built a physical interaction display that brought the Smith campus together
- Created impressive, interactive visualizations in Tableau

Cheers to you!

Thanks for a great semester – your engagement, perspectives, and creativity made this class a joy to teach.

I'm extremely proud of how much you all learned in such a short time, and I hope you're proud of yourselves, too!

Please take the rest of class to fill out your course review.

Good luck with finals! You got this!
